

Optimizing sound settings in Zoom

To make your bell sound great

1. In the lower-left corner of your Zoom app, click the arrow beside the microphone.
2. On the menu that appears, click **Audio Settings**:

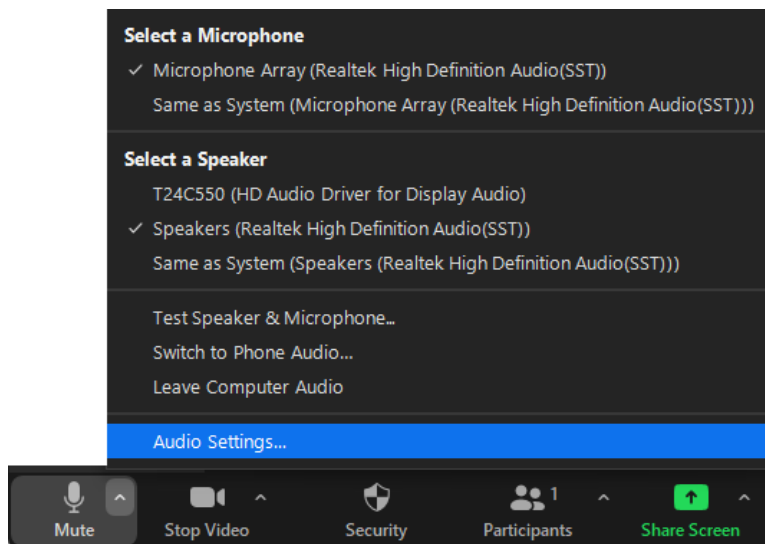

3. The **Audio Settings** screen appears. Scroll to the bottom, and then click **Advanced**.
4. Under **Echo cancellation**, select Aggressive.

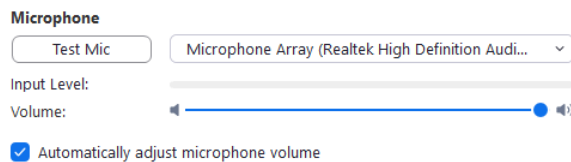

To test the sound of your bell in Zoom

1. In the lower-left corner of your Zoom app, click the arrow beside the microphone.
2. On the menu that appears, click **Audio Settings**:

3. The **Audio Settings** screen appears. Prepare to ring your bell, and then, in the Microphone area, click **Test Mic**.

4. When the **Test Mic** button switches to say **Recording**, ring your bell. Recording will stop after a few seconds, and Zoom will play back the sound.
